Next Week (Monday): (Week 6) [November 21 - November 27]

Carried over from **last sprint**:

- Add CSV Upload to Questions (Mathu) (U2 T4) (2)
- Validators for parsing data files (David) (NST, T3) (4 \rightarrow 3 left)
- Validators for professor entering questions (David) (NST, T6) (5 \rightarrow 3 left)
- Validators for professor entering assignments (David) (NST, T7) (5 \rightarrow 2 left)
- Display class average for an assignment on the GUI (Jason) (U8, T2) (4 → 1 left)
- Display deadline of an assignment on student GUI (Jason) (NST, T9), $(3 \rightarrow 1 \text{ left})$

New this sprint:

- Figure out how to parse a question such as "a+b" into variables (Gavin) (U9, T1) (6)
- Make function to parse "a+b" variable questions from database and create question for assignment (Gavin) (U9, T2) (5)
- Parse "a+b" answer function from assignment, and calculate answer (Gavin) (U9, T3) (5)
- Display "a+b" questions and check (Jason) (U9, T4) (2)
- Refactor DOA move validators to separate file (David) (NST, T10) (2)
- Create an 'add professor' button on the GUI (Mathu) (NST, T11) (2)
- Add ability to remove student from database (Mathu) (NST, T12) (1)
- Add option for professor GUI to remove student from database (Mathu) (NST, T13) (1)
- Create logout button for student (Jason) (NST, T14) (1)
- Create logout button for professor (Mathu) (NST, T15) (1)
- Make visual improvements to Student GUI (Jason) (NST, T16) (3)
- Make visual improvements to Professor GUI (Mathu) (NST, T17) (3)
- Put Sloth background on GUI pages (Jason) (NST, T18) (4)

Sprint Report

This week's sprint was our most productive sprint with all tasks complete. We assigned more tasks this sprint compared to previous sprints. This sprint we were able to complete more from previous sprints due to improvements in our team communication and pressure to complete the remaining tasks before the end of the project. During this sprint we also transferred task responsibilities around to different team members for similar coding tasks or features.

David: Created and finished the validators for testing uploading files(ie. Make sure the contents are valid), and professor input for adding assignments and questions. Also, took the validator methods in DOA and put it into it's own package/class.

Gavin: Created functions for removing students and their marks from courses after the course has been completed.

Jason: Worked on finishing components of the Student's GUI related to displaying properties of an assignment. Implemented CSS styling across Professor and Student GUI. Added other small GUI features.

Mathu: Added functionality to add Professors to the back and front end. Added way to add csv files of Assignments and Questions. Added buttons to be able to remove student information from courses and assignment marks. Figured out and implemented random variables to the questions.
